ADPP MOZAMBIQUE'S HEALTH PROGRAMS

- Total Control of the Epidemic (TCE) model implemented in collaboration with the Ministry of Health, mobilizes communities to take charge of their own health.
- Engages community leadership to deliver integrated solutions in HIV and TB prevention, testing, and treatment adherence.
- Provides integrated health services across all 10 provinces.

7.5 MILLION PEOPLE REACHED BY TCE

► HIV/AIDS

ADPP's TCE model incorporates stigma prevention, economic support, and youth-friendly spaces to improve care.

In 2025, ADPP supported:

- 573,335 people mobilized with prevention and treatment messages
- 64,563 people tested for HIV
- 1,124 PLHIV joined Savings and Credit groups, 80% of which achieved viral load suppression

► Tuberculosis

ADPP's Total Control of TB approach uses Active Case Finding and the OnImpact platform to empower communities to report and reduce barriers to services.

In 2025, ADPP ensured:

- 5,540 daily barriers were reported; 74% resolved
- 2,219 individuals linked to TB treatment and care in Matola - 29% of provincial TB cases
- 33,000+ people informed about prevention and treatment

► Malaria

ADPP works with communities to prevent malaria. In 2025:

- 5,194 volunteers and 1,336 Community Leaders engaged
- 228 schools promoted malaria prevention practices
- 545,000+ children aged 3-59 months received malaria preventive treatment
